GENESIS

WASDAQ : The Revolutionary Token That Brings Investors a Better Life/Investing Balance with Predefined Trading Hours

DeFi is a powerful market but with high risks that we all know: no safeguards.

Tired of staying up late and waking up early with the fear that your token price has dropped?

That's why we created WASDAQ.

WASDAQ (\$WSDQ) is the world's first token that you can trade at predefined hours, like stocks

MONDAY – FRIDAY : 1:30 pm – 8:00 pm UTC

SATURDAY – SUNDAY : CLOSED

The project started in May 2021 and was launched on Binance Smart Chain and listed on PancakeSwap on July 5th

We have developed a revolutionary smart contract called Gatekeeper that is responsible for setting the trading hours. During the closing trading hours, Gatekeeper blocks trading activities : so, the LP price cannot drop.

You can enjoy family/friends time, be away from screen or go to bed safely.

Our goal is to launch a trading platform with several predefined trading hours tokens, with reliable tools to trade them efficiently. This trading platform will host other projects / tokens (guest) who want to offer trading at predefined hours.

We believe that predefined trading hours can give mass public adoption to the cryptos market.

WSDQ SMART CONTRACT

WASDAQ (\$WSDQ) is compound with two smart contracts:

1. The WASDAQ (WSDQ) token Smart Contract (BEP20 AND ERC20 Compliant)
0xafc4d521df3c0566d61931f81f02f1a525bad04d

1,000,000,000 Total Supply (850,000,000 burned - unsold tokens after ICO White List)
150,000,000 Maximum Circulating Supply

<https://bscscan.com/address/0xafc4d521df3c0566d61931f81f02f1a525bad04d#code>

Launched first on BSC (July, 5, 2021) and then on Avalanche chain (for mid-October /early November 2021) with a bridge.

100% Liquidity locked for 3 years

100% Team Wallets locked for several months

80% Marketing/development Wallet locked for 3 months.

Team and Marketing Wallets will be used for Avalanche chain /other chains, development project, employees and OTC

Team wallets will remain locked until the team is doxxed. [Link to Locked Wallets](#)

WSDQ TOKENOMICS

Maximum Circulating Supply : 150,000,000

Binance Chain Supply : 60,000,000

ICO White list : 25,000,000

PancakeSwap LP : 25,000,000

Marketing / airdrop wallet : 10,000,000 (could be used to reinforce the LP)

Locked for project development : 90,000,000

Team : 24,000,000

Will be used for development company : devs/
partners/ employees/ OTC/ ...

Technical developments / marketing : 66,000,000

Will be used to create cross chains LPs (Avalanche,
Ethereum, ...)

tokens for bridge arbitrage, platform development,
OTC, marketing

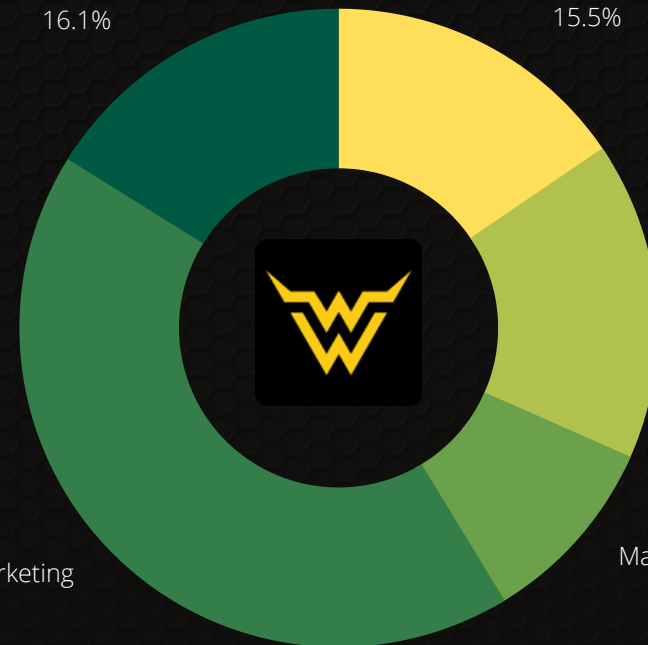

BSC White List
16.1%

Locked Team
15.5%

PancakeSwap LP
16.1%

Marketing Wallet
9.7%

Locked technical developments / marketing
42.6%

GATEKEEPER SMART CONTRACT

2. The Gatekeeper Smart Contract

0xf31962fa616cf12670cde88af80d448dc528f397

<https://bscscan.com/address/0xf31962fa616cf12670cde88af80d448dc528f397#code>

The Gatekeeper is the smart contract that controls the WSDQ token trading times. Whenever a user or Pancakeswap initiates a transfer, Wasdaq will request the Gatekeeper for the current trading status.

Upon Wasdaq's request, the Gatekeeper retrieves the actual time from the blockchain, computes the status of the transactions, and sends it back.

Smart Contracts audited by TechRate with 0 issue

<https://github.com/TechRate/Smart-Contract-Audits/blob/main/Wasdaq.pdf>

GATEKEEPER

During closed times, token sales and transfers are blocked, but your wallet remains safe until the next opening time.

AVALANCHE C- CHAIN & BRIDGE

Holders will be able to trade \$WSDQ on Binance Smart Chain's or on Avalanche's C-Chain, or both if they wish, using a bridge developed by our team that allows holders to transfer their tokens between the two networks for mid-October / early November.

Avalanche "Contract Chain" supports the Ethereum virtual machine : this allows us to display our BSC code without any modification.

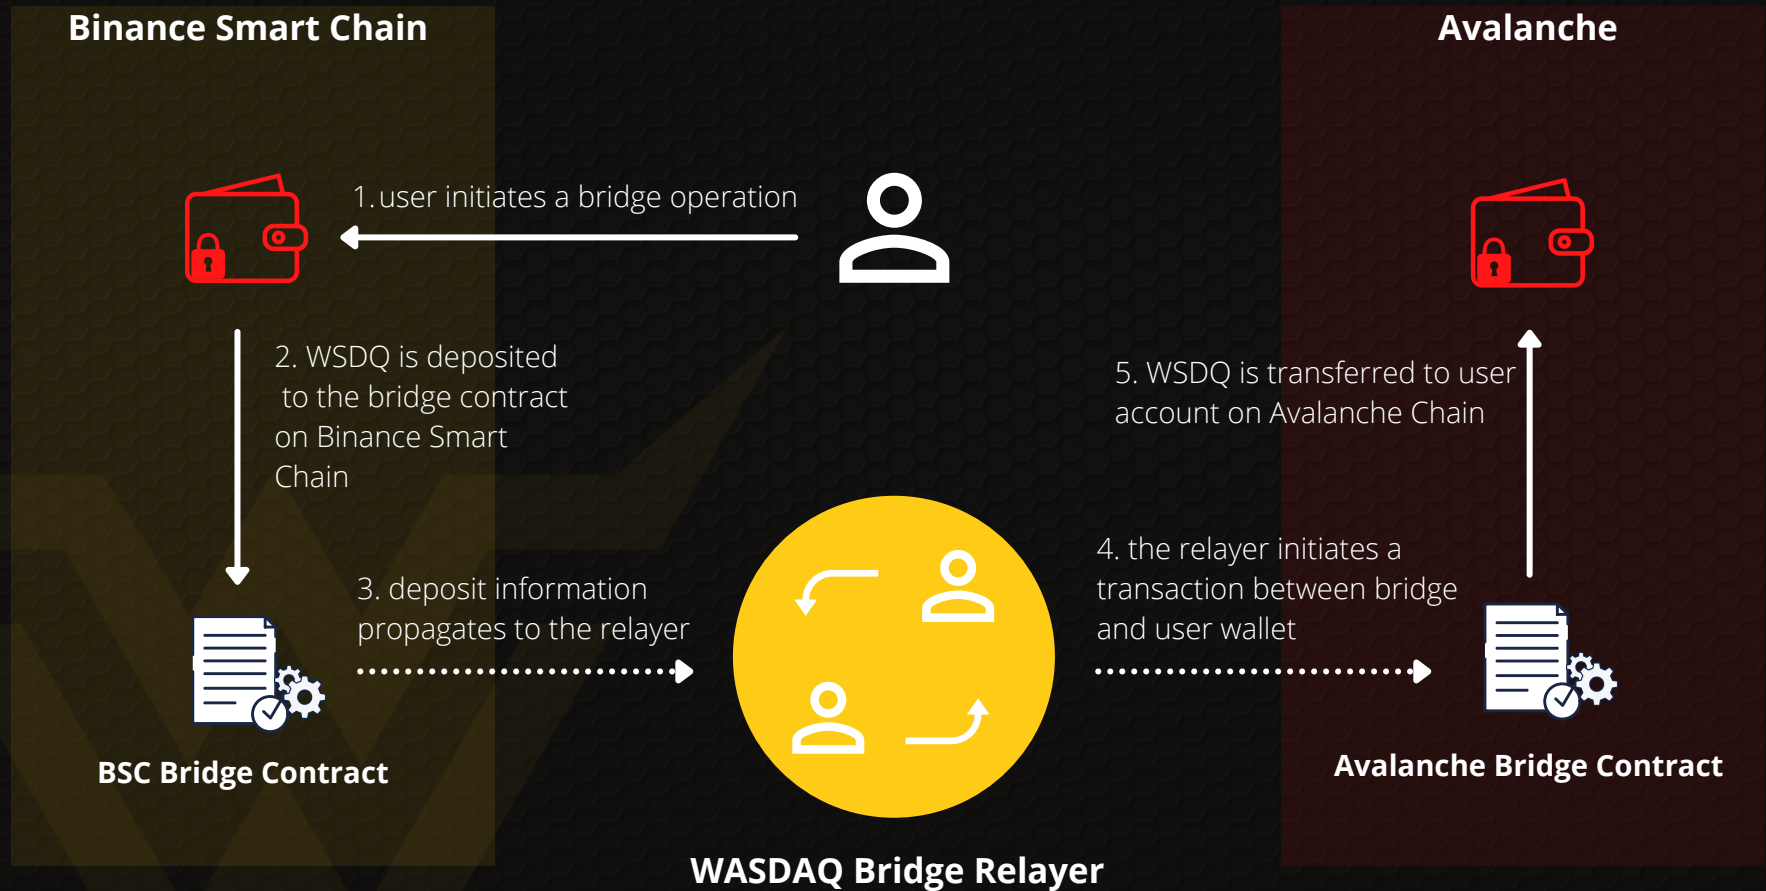

The bridge we are developing will allow to use several Blockchains and not only BSC and Avalanche.

The launch price of \$WSDQ on Avalanche will be identical to the BSC.

Price variations between the networks will be regulated by arbitrage via \$WSDQ tokens in the bridge.

BSC and Avalanche \$WSDQ tokens can circulate through the bridge without exceeding the maximum \$WSDQ supply: 150,000,000

WASDAQ BRIDGE

TRADING PLATFORM

Our trading platform will host other projects / tokens (guest) who want to offer trading at predefined hours.

As you already know, we have the Wasdaq market (which offers the same trading hours as Nasdaq) and then, we will launch (when Wasdaq adoption is stronger) 3 more tokens (markets) with their own Predefined Trading Hours.

This way, we will have a global 24/7 trading offering for anyone who wants it.

For example, a project owner / company IRL could decide to offer to trade their token on our trading platform, the Wasdaq market and another market with predefined hours that we will have.

Or all the 4 market with predefined hours if they wishes.

Each market therefore has its governance token (WSDQ for Wasdaq currently)
And every time a guest token is traded on one of our markets, a % fee is paid to the holding company and a % fee is returned to the holders of our markets governance tokens with the main token of the trading platform (*for exemple : Binance has BNB token as the main token of its trading platform*)

The long term vision is to become the first exchange platform in the world to offer trading with predefined market hours.

And like any type of exchange, there are fees on buy / sell orders. And, as governance token holders, you will receive % fee on volumes.

*we already have the names of the 3 future tokens and the brand name of our future trading platform. To avoid copycat, this information is confidential.

W PLATFORM* ECOSYSTEM

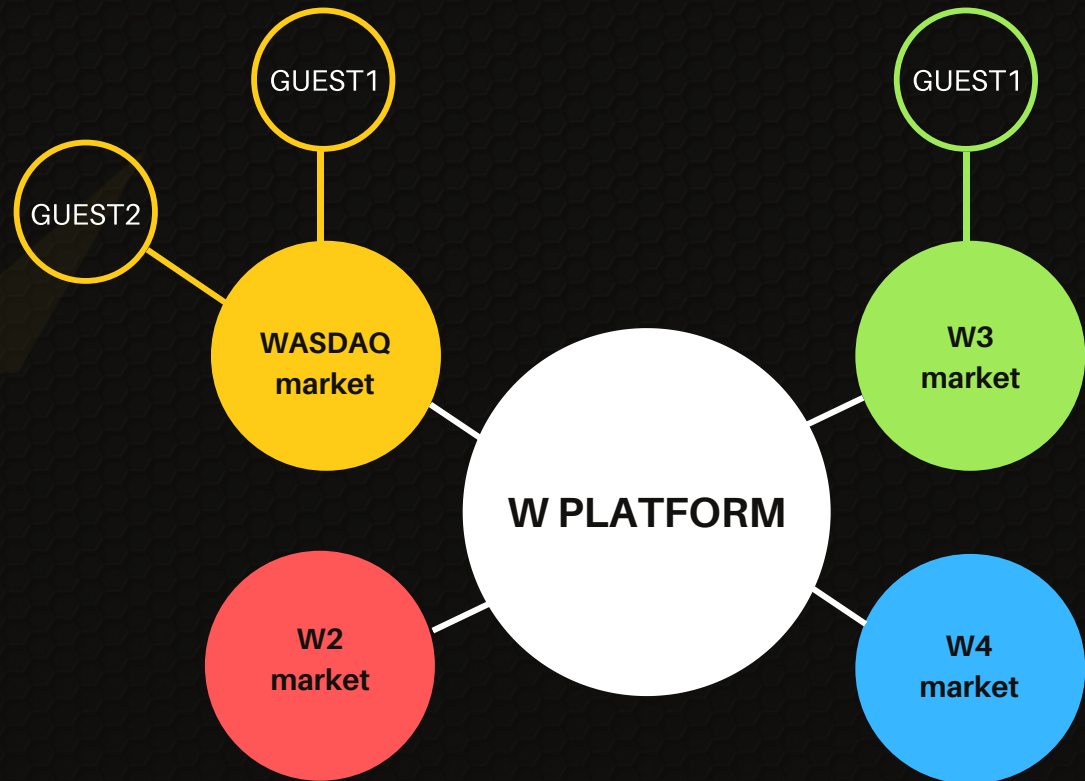

4 markets with their own Predefined Trading Hours and governance tokens for a 24/7 global trading for guests projects

WASDAQ MARKET : MON - FRI : 1:30 pm to 8 pm UTC / SAT-SUN : CLOSED

W2 MARKET* : DAYS - HOURS

W3 MARKET* : DAYS - HOURS

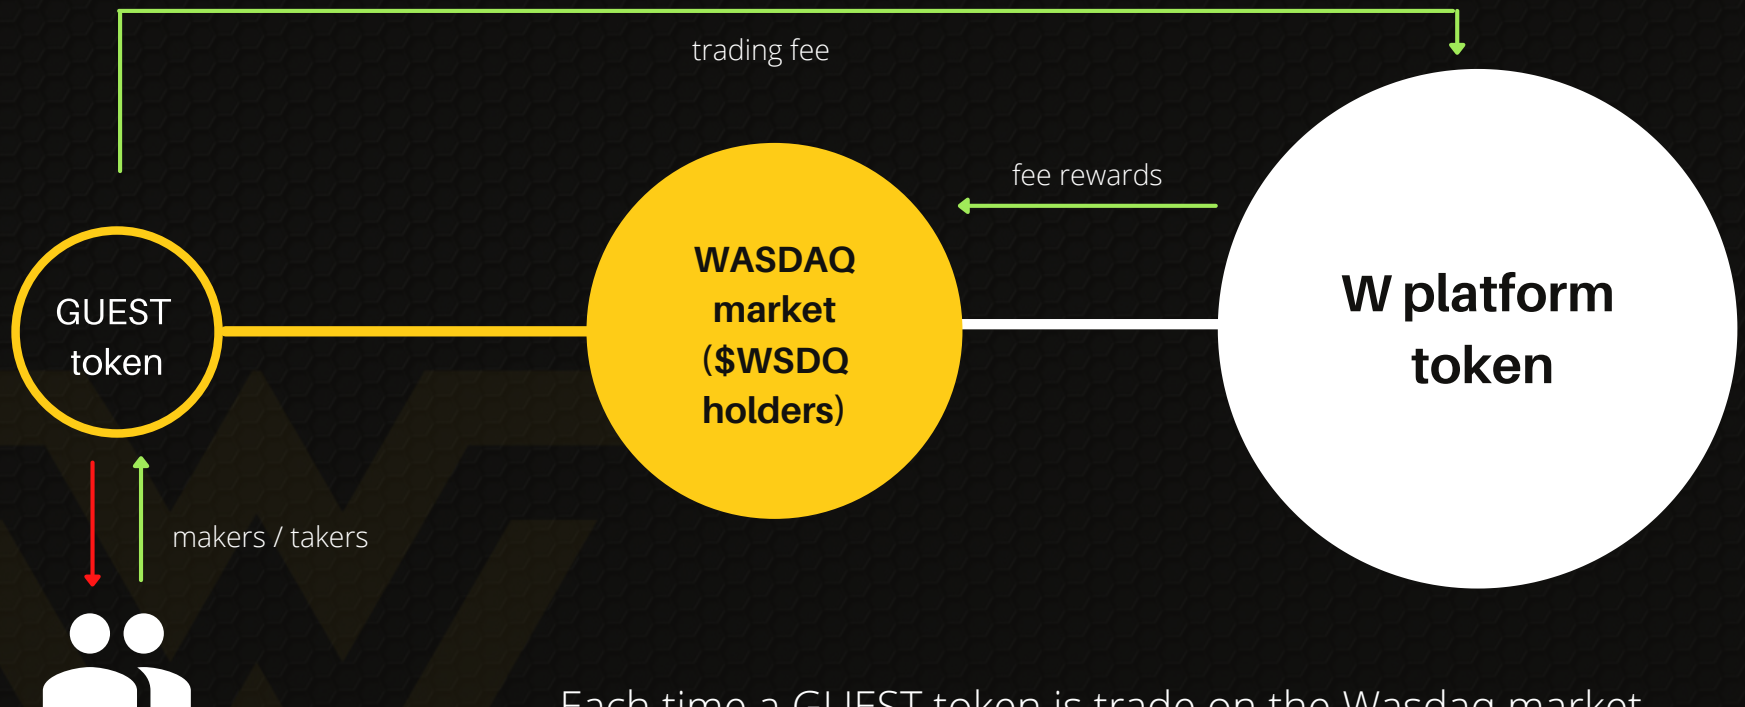

W4 MARKET* : DAYS - HOURS

***W2, 3, 4 markets** names and trading hours are confidential to avoid Copycats

***W Platform name** is confidential to avoid Copycats

WSDQ TOKENOMICS ON THE PLATFORM

Each time a GUEST token is trade on the Wasdaq market, a % fee go to the W platform (holding company) and a % is returned to the holders of \$WSDQ with the main W platform token

VISION

We believe in the growing interest in cryptos and know that this is the beginning of a new financial era.

We are also convinced that many projects have great value but unfortunately suffer from the lack of safeguards.

It's hard today to hold a position on a token, a project, without being afraid to go to bed and wake up with the fear that your token position has dropped.

We launched Wasdaq to solve all of these problems in the crypto market.

Wasdaq allows you to take back control of your life, trade only during business hours and be safe when the market is closed, as the LP token's price couldn't drop.

Our community is very important, it is inconceivable for us to not share with you our vision of our projects. It is only together, with our common synergy, we will succeed in making our W Platform the first Safe Secure Exchange and provide investors with a Better Life/Investing Balance with Predefined Trading Hours.
